

GLASSMAKING WORKSHOPS (after archaeological data from the excavations of the medieval production complexes on Kyiv)

The archaeological research in Kyiv has yielded a wealth of material for the study of glassmaking in Old Rus'. The lecture will contain characteristic of the glassmaking workshops and a description of glass finds and include the results of the quantitative emission spectral analysis of the glass samples from glassmaking workshops to determine the chemical type of the glass.

Zhurukhina Olena, Head of scientific research department of the Museum of Desiatynna church history, Observatorna str. 21 A, Kyiv, 01001, Ukraine, e-mail: lenzhurukh@gmail.com
